

Exploring Artefacts from the Time of John Bunyan.

These are photos of real things we have in the museum. Use them to do the following activities:

1) Print them out and cut out each picture.

Put them in to groups depending on what they are made from.

Put them in to groups depending on what they are used for.

2) Spread them out and try to describe one to someone else in your house. Can they pick up the one you are describing?
(make it harder by only giving them 3 clues)

3) Print out 2 sets . Spread them out upside down and turn over two at a time. How long does it take you to find all the pairs.
(If you don't turn over a pair- turn them back over and try to remember what they were.)

4) Cut out a circle or use a paper plate to decorate it like this one.
